Legenda

ND: Not Detected. Indica che l'analisi risulta "Non Rilevato" mediante l'analisi condotta con il metodo specificato.
Inc: Incertezza estesa, espressa nelle stesse unità di misura del risultato, calcolata adottando un fattore di copertura K=2 (se non diversamente specificato) per assicurare un livello di fiducia prossimo al 95%. LOD: Limite di rilevabilità, definito come la più bassa concentrazione dell'analita in un campione che può essere rilevata, ma non quantificata, nelle condizioni specificate;. LOQ: Limite di quantificazione, la più bassa concentrazione dell'analita in un campione che può essere determinata, con accettabile precisione ed esattezza. Rec: Recupero medio percentuale.
